## **eProcessingNetwork Partners with Ingenico at the Point of Sale**

### *POS Solution Supports Signature Capture Terminals*

October 8, 2008 – Houston, Texas. eProcessing Network, LLC, one of the leading payment gateway and software development companies in the industry, announced today that its popular point-of-sale solution, ePNJPOS, now supports the i6550, one of the flagship signature capture and touch screen terminals of Ingenico, the global leader in payment and transaction processing devices.

ePNJPOS offers secure in-store point-of-sale transaction processing through a number of different devices, include magstripe readers, MICR readers and combination magstripe readers / printers. The i6550 is a secure, signature capture and touch screen terminal with added capabilities of sophisticated software, resistive/capacitive technology to improve signature quality, speed of checkout, prompt for PIN entry and durable hardened glass screens.

This new pairing of the ePNJPOS solution with the i6550 terminal will give the payment processing industry an unprecedented opportunity to increase revenue and expand merchant portfolios. By now supporting Ingenico's i6550 terminal, eProcessing Network will also broaden its already extensive merchant base with customer-facing technology coupled with signature capture.

"We chose to join forces with Ingenico because of their leadership position in the industry, the quality of their terminals and the scope of their merchant base," says Steve Sotis, President of eProcessing Network. "We are very excited to offer integration of Ingenico's i6550 as a new component of our software programs. One of our many differentiators is that we have supported PIN debit for many years, and the i6550 is a great fit with our ePNJPOS solution. In tandem, our gateway services are equally complimentary to Ingenico's payment solutions."

"Ingenico has deployed over 1 million signature capture devices in the U.S. and is the undisputed technology leader in secure, touch screen, signature capture transaction terminals," says Lisa Shipley, Senior Vice President, Sales & Marketing, Ingenico North America. "Our penetration into the top 100 retailers in America is unmatched by any other manufacturer as is our expertise and knowledge in the integration of these solutions. eProcessing Network is at the top of their game as well and this partnership is a perfect compliment to both our companies' outstanding products and services."
