FOR IMMEDIATE
RELEASE

eProcessing Network is EMV-Certified Through the Elavon Payments Platform
The Leading Payment Gateway Offers Secure, EMV Capabilities to Retail Merchants

HOUSTON, Texas, May 4, 2017 — eProcessing Network, LLC (ePN) is pleased to announce that it has been certified by Elavon to accept EMV™ transactions with the Castles Technology MP200 terminal. As payment technology experts, Elavon brings expertise and a global perspective to the payments industry, and has worked with eProcessing Network to complete end-to-end EMV certification that offers real-time EMV capabilities to ePN's valued merchant base.

eProcessing Network's EMV certification includes the Castles Technology's MP200, a next generation of semi-integrated, compliant-payment terminals for both iOS and Android platforms using either Bluetooth or USB connections. EMV Certification through the Elavon Payments Platform allows merchants to process both contact and contactless transactions for Visa®, MasterCard®, Discover® and American Express® payments, and supports Retail and PIN-Debit transactions in conjunction with ePNJPOS, ePN's Retail software solution. eProcessing Network also provides APIs for ISVs and other developers to help integrate ePN's PCI-Compliant software into their applications.

"Merchants are finding that becoming EMV compliant can be a confusing and cumbersome process," said Steve Sotis, President of eProcessing Network. "ePN is working step-in-step with leading processors like Elavon to deliver timely and affordable solutions that help limit merchant liability, which in turn can help reduce costly chargebacks."

About eProcessing Network, LLC

eProcessing Network (ePN) is a software development company specializing in secure, real-time transaction processing services, solutions and support for all small to mid-sized merchants. Headquartered in Houston, Texas, ePN is certified to process a comprehensive suite of electronic payment transactions through all major credit & debit card, check/ACH and gift card/loyalty processors, and sells its services and products exclusively through Resellers and ISO sales channels. eProcessing Network is a registered Visa USA® and MasterCard® Third-Party Service Provider and is compliant with PCI and PA-DSS Data Security Standards.
