eProcessing Network Launches Mobile Developer SDKs

ePN Helps Developers Add Mobile Payments to Third-Party Apps.

HOUSTON, Texas, September 16, 2013— For over 17 years, eProcessing Network, LLC, (ePN) (www.eProcessingNetwork.com) has carefully developed a reputation for developing payment industry software and tools for both online and brick & mortar merchants and developers in a variety of industries. Today, ePN Resellers and the Developer community are using ePN's software technology to assist merchants with all types of payment acceptance and ePN is pleased to announce the launch of its new Mobile Software Development Kit (SDK), helping developers easily integrate encrypted payment into their iOS and Android applications.

The ePN SDK provides all of the necessary APIs, Hardware, Sandbox and Resources that mobile app developers require to begin building advanced and innovative point-of-sale solutions for today's fast paced market. All eProcessing Network Mobile SDKs are designed to work seamlessly between the encrypted card readers and the ePN PCI-compliant network, keeping developer's apps completely out of PCI scope.

"eProcessing Network was one of the payment industry's first payment companies to offer mobile payments – dating back as early as 2000, we understand the nuances of mobile payments," says Steve Sotis, President of eProcessing Network. "With today's smart phones and tablets, developers have access to many forms of commerce applications creating a new era in mobile payment acceptance."

Adds Bruce R. Shirey, SVP of Business & Product Development, "The business objective for eProcessing Network waiting to release its mobile SDKs was to ensure ease-of-integration and to assist the mobile app developers to take complete advantage of the exponential growth of the Mobile Commerce markets."

About eProcessing Network, LLC

eProcessing Network (ePN) is a software development company specializing in secure, real-time transaction processing services, solutions and support for all small to mid-sized merchants. Headquartered in Houston, Texas, ePN is certified to process a comprehensive suite of electronic payment transactions through all major credit & debit card, check/ACH and gift card/loyalty processors, and sells its services and products exclusively through Resellers and ISO sales channels. eProcessing Network is a registered Visa USA® and MasterCard® Third-Party Service Provider and is compliant with PCI and PA-DSS Data Security Standards.
