

## **eProcessingNetwork Now Offers Mobile Remote Deposit Capture Functionality**

*ePN offers the latest in mobile payment solutions with mRDC through Paya and ePNMobile.*

**HOUSTON**, Texas, December 21, 2022 — [eProcessingNetwork, LLC \(ePN\)](#), a software development company specializing in secure real-time transaction processing, services, and support, announced today it has partnered with [Paya \(NASDAQ: PAYA\)](#), a leading integrated payments and commerce solution provider, to offer its first-to-market mobile remote deposit capture (mRDC) payment solution. Available through Paya and ePNMobile payment applications, it provides small-to-mid-sized merchants easy check acceptance functionality through their device's camera.

Mobile remote deposit capture (mRDC) technology is now a mainstay for many fully banked consumers and large businesses but remains a challenge for the small-to mid-sized businesses (SMBs). A survey of US-based SMBs found that paper checks continue to be a routine way that businesses receive payments, with check use increasing over the last three years in many B2B verticals. eProcessingNetwork is taking the lead in providing an all-in-one solution that simplifies the check deposit process and increase merchant productivity.

“Most small business owners already utilize their smartphones for personal deposits, so mRDC for their business is a natural transition,” said Steve Sotis, President of eProcessingNetwork. “ePN offers our mRDC feature through ePNMobile, our robust mobile payment app, to provide SMBs with simple, secure, and affordable functionality.”

By downloading the ePNMobile app on iOS or Android devices, B2B merchants can deposit checks electronically with a quick capture of the check image. Integrated with ePNMobile, mRDC adds value and versatility, making it a one-stop mobile payment solution. With mRDC, merchants can easily consolidate deposits and access online reporting from multiple locations and with multiple users. The optical character recognition (OCR) technology powering mRDC functionality reduces the possibility of errors and fees associated with depositing paper checks, and eliminates the need for manual check entry, saving the merchant time and money, with a positive impact to their bottom line.

“Mobile RDC solutions like ePN's can help small businesses meet the demands of receiving paper checks, which remains a prominent method of B2B payments today,” said Chris Brundage, Head of PayaACH at Paya. “The secure and cost-effective technology improves SMB efficiency by reducing manual data entry, lost checks, and time for funds to clear.”

### **About eProcessing Network, LLC**

eProcessing Network (ePN) is a software development company specializing in secure, real-time transaction processing services, solutions, and support for all small to mid-sized merchants. Headquartered in Houston, Texas, ePN is certified to process a comprehensive suite of electronic payment transactions through all major credit & debit card, check/ACH and gift card/loyalty processors, and sells its services and products exclusively through Resellers and ISO sales channels.
