eProcessing Network Leads the Transaction Processing Industry with Real-Time Shipping Rates Seamlessly Integrated Into Their Online Shopping Cart

On-the-Fly Shipping Calculations Provide Merchants with the Customization Needed to Succeed on the Internet.

HOUSTON, Texas, October 4th, 2011—eProcessing Network, LLC, the leading independent payment gateway and software development company in the Electronic Payment Processing Industry, continues to differentiate themselves by offering ePNShip, a real-time shipping rate calculator that is fully integrated into ePNCart, a secure, easy-to-implement and customizable shopping cart for merchants who manage Internet storefronts.

Merchants who maintain an online presence can use ePNShip to offer their customers the flexibility of choosing the shipping method that works best for them. “Since ePNShip offers live calculations for the U.S. Postal Service, FedEx and UPS, or any combination chosen, the merchant can easily offer shipping solutions tailored to the specific products they offer,” says Steven Sotis, President of eProcessing Network.

The advantages of utilizing ePNShip in conjunction with the powerful ePNCart means merchants don’t have to spend precious time setting up an account with a different third-party provider, saving them time and extra fees. Plus with the flexibility of ePNShip, merchants can easily define and add handling fees to orders placed via their site, giving them even more opportunity for customization.

States Sotis, “By integrating live shipping calculations into our simple, yet powerful shopping cart, eProcessing Network helps merchants capture a growing segment of online shoppers and remain competitive on the Internet.”

About eProcessing Network, LLC

eProcessing Network, LLC is a software development company specializing in secure, real-time transaction processing services, solutions and support. The eProcessing Network Payment Gateway processes transactions using each merchant’s own merchant account. Headquartered in Houston, Texas, eProcessing Network is certified to process a comprehensive suite of electronic payment transactions through all major credit card, check/ACH and gift card / loyalty processors, and sells its services and products exclusively through the ISO sales channel. eProcessing Network is a registered Visa USA® Third Party Service Provider and is compliant with the PCI Data Security Standard.
