*e*Processing*Network*

the *everywhere* Processing Network™

ePN **PREMIER***Verify* SC
and **bbpos**
WisePad™ 2 & WisePad™ 2 Plus*
are EMV-Certified on the

Elavon
Platform

eProcessing **Network** (**ePN**) is pleased to announce that the Premier Verify SC, the WisePad™ 2 and WisePad™ 2 Plus* are now EMV-certified on the Elavon Platform. With this newest certification, Elavon merchants can utilize the right tools that will help to make payment acceptance of Visa, MasterCard, American Express, and Discover faster, easier, and more cost-effective.

Premier *Verify* SC
ePN's high-speed, secure dual-chip and mag-stripe reader is EMV-compliant for both iOS and Android platforms using Bluetooth or USB/WiFi connections, and supports over-the-air firmware updates. The durable, lithium polymer rechargeable battery stays charged for 420 EMV transactions, or 700 mag-stripe transactions.

WisePad™ 2 & WisePad™ 2 Plus*
Both PCI-compliant devices work seamlessly with **ePN**JPOS and **ePN**Mobile, and read EMV chip and triple-track mag-stripe cards; both have a secure PIN pad for PIN-debit EMV, and are contactless-enabled. With quicker processing capabilities, merchants can reduce their transaction times by 50%.

For Existing Merchants: To add Premier Verify SC, WisePad™ 2 or WisePad™ 2 Plus for your existing merchants, log into your **ePN** Reseller Support Center (RSC) account and select "Optional Services".

For Newly-Boarded Merchants: You can add Premier Verify SC, WisePad™ 2 or WisePad™ 2 Plus to the gateway account while you are in the "Add A Merchant" section of the RSC, as you would other **ePN** solutions.

*Also referred to by the Phoenix Group as the Nomad WP2 and Nomad WP2 Plus.
