

eProcessingNetwork

the *everywhere* Processing Network™

Partner Spotlight

POSDATA

eProcessing Network's (ePN) offers several options when it comes to EMV-certified equipment to meet your merchants various needs. All devices support contactless payments such as Google Pay and Apple Pay. With quicker processing capabilities, merchants can reduce their transaction times by 50%. Truly a 3-in-1 device as they each work with ePNMobile, ePNJPOS, and ePNPlugIn:

WisePad™ 2 & WisePad™ 2 Plus

Both devices offer EMV, NFC, MSR, and PIN-debit payments. They can be connected via USB, WiFi, or Bluetooth. The WisePad 2 Plus includes an integrated printer for a compact on-the-go solution.

MP200L

The device supports EMV, NFC, MSR, and PIN-debit payments while connected via USB, WiFi, or Bluetooth. The deeper profile accommodates a "detachable" battery, and has a signature capture enabled screen.

Chipper 2X BT

The ultra-compact, USB or Bluetooth-capable device is both powerful and flexible. It supports EMV, MSR, and NFC payment functions. The extended battery life makes this reader perfect for high-volume businesses.
