eProcessing Network Integrates With PowaPOS for Superior Retail Processing

SMBs can now use ePNMobile Tablet for iOS & Android with the All-In-One PowaPOS T25 for a Complete and Affordable Retail Solution

HOUSTON, Texas, February 18, 2015 — eProcessing Network, LLC (ePN), the leading independent payment gateway and software development company in the electronic payments processing industry, today announced integration of its ePNMobile for Tablet iOS and Android Application with Powa Technologies' PowaPOS T25 – the industry's first all-in-one POS platform purpose-built for tablet-based payments.

For the small to mid-sized merchant looking to implement a single POS system into their retail strategy, the PowaPOS T25 is the ideal solution. In contrast to other tablet-based POS systems, the T25 offers merchants a secure and inclusive system for the retail industry, combining a printer, 2D scanner, EMV-readiness and more into one space-saving design. Combined with the security and strength of ePNMobile for Tablet iOS and Android, eProcessing Network's cloud-based application, the PowaPOS T25 supports an expansive variety of peripherals and payment devices, including NFC-enabled and Apple Pay devices.

"With the demand for tablet-based payments growing at a rapid pace, retailers are searching for a smart but powerful solution: a fully integrated, secure, and easy-to-implement point of sale system, " said Michael Struttmann, SVP & GM of North America, PowaPOS. "By combining the all-in-one functionality of the PowaPOS T25 with the strength of the ePNMobile application, merchants have a true 'plug and pay' solution - and one that provides a higher level of service and peace-of-mind to their customers."

"eProcessing Network understands what Independent Sales Offices (ISOs) need in order to support the small business merchant of today," added Steve Sotis, president of eProcessing Network. "Integration with a versatile and cost-effective device such as the PowaPOS T25 is just another way that ePN works diligently to not only meet, but exceed the needs of the ever-changing market."

About eProcessing Network, LLC
